BUILT FOR BETTER PLAY

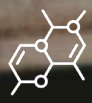

THERMO BONDED

Experience next-level performance with a thermobonded ball – crafted without stitches for a seamless surface that enhances aerodynamics, ensures consistent play, and resists water absorption.

DOUBLE-BONDED

Built to last – our double-bonded ball combines stitching with adhesive for superior strength, enhanced durability, and improved water resistance compared to traditional stitched balls.

HYBRID TECHNOLOGY

Engineered with hybrid technology, this ball features nearly invisible seams that enhance consistency, improve durability, and significantly reduce water absorption for reliable performance in all conditions.

ACE

With ACE [All Condition Excellence] technology, this ball is built to deliver consistent touch, control, and durability in any weather – rain, sunshine, or snow.

HAND STITCHED

Crafted by hand with reinforced seams, this ball offers outstanding durability and a long lifespan – designed to withstand intense play season after season.

MACHINE STITCHED

Designed with machine-stitched panels for a clean finish, consistent shape, and dependable performance – an ideal choice for training and recreational play.

LIGHTWEIGHT

Our lightweight football makes every kick feel smooth and natural. Easier to control, easier to strike. Ideal for training, recreational matches, or younger players developing their skills.

THE FIFA QUALITY PROGRAMME

The FIFA Quality Programme for Footballs ensures high standards by rigorously testing balls in lab conditions. Balls used in FIFA-organized matches must have a FIFA quality mark, guaranteeing consistent performance, every game. To earn the FIFA quality mark, a ball must pass seven tests evaluating weight, circumference, roundness, bounce, water absorption, pressure retention, and shape durability.

FOOTBALL INFLATION GUIDE

PREPARATION

During wintertime we suggest to store the footballs at room temperature [20 – 25°C] for minimum 24 hours before the first inflation in order to secure optimal softness and shape.

Unfold the football with both hands and shake the bladder free.

VALVE OIL

Drip 1 – 2 drops of valve oil into the valve. It is important that valve-oil is used at every inflation as it makes the valve seal properly.

INFLATE

Position the valve upwards and insert the inflation needle straight into the valve. Always use a long pump needle to ensure the needle does not damage the valve or the bladder.

CHECK PRESSURE

- Inflate the ball to the recommended pressure.
- Recommended pressure is printed on the ball near the valve.
- Inflate slowly to allow the ball to gain its correct shape. Rapid inflation can damage the bladder.
- Use a pressure gauge to check the pressure of the ball.

FOOTBALL MAINTENANCE GUIDE

BEFORE EACH INFLATION

Always drip 1 – 2 drops of valve oil into the valve before inflation to ensure that it seals properly.

STORAGE

Store the ball at reduced pressure in a dry ventilated room at 20 – 25°C.

CLEANING AND DRYING

After use clean the football in mild soapy water and rinse with water. Then wipe the ball off with a towel and let it fully dry in a dry, airy place at 20 – 25°C.

Never dry the ball on or near a heating device.
